

Occupational and Speech Therapy

Our multidisciplinary team has years of experience and training related to autism spectrum disorders and sensory processing.

Occupational Therapy

- Sensory regulation, modulation and diet.
- Self-help skill development - specific skill training to increase independence with self-feeding, dressing, bathing and chores.
- Fine motor and handwriting skill development.
- Play skills - expansion of rote play to imaginative and creative play.
- Groups - social skills, cooperative problem solving and play, "How Does Your Engine Run?®"

Speech Therapy

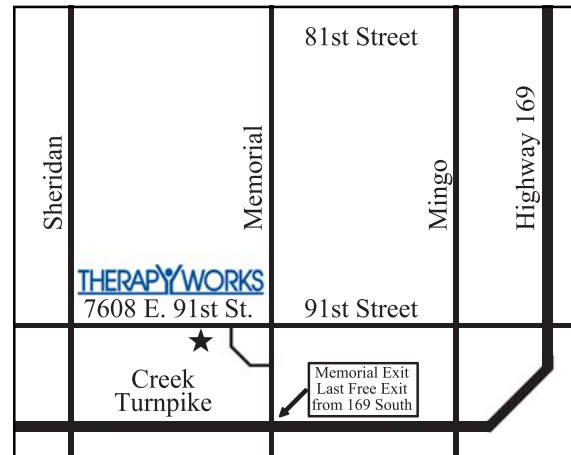

- Easy EatingSM - specialized feeding program for picky eaters and problems feeders.
- Speech and language services to specifically address articulation and apraxia issues, receptive and expressive language delays.
- Social communication skills.
- Supplemental communication - PECS, sign language and augmentative communication devices.

How Does Your Engine Run?® is a registered trademark of TherapyWorks, Inc., in Albuquerque, N.M.

TherapyWorks' Goal

Our goal is to change the lives of children and families by helping them overcome the obstacles of autism spectrum disorders.

TherapyWorks provides occupational, speech and physical therapy in our state-of-the-art outpatient pediatric clinic, conveniently located in South Tulsa.

Autism Spectrum Disorders

THERAPYWORKS
working wonders in children's lives

Floortime™

Floortime™ is a treatment model that begins where the child is currently functioning and draws him or her into the world.

Floortime™ builds the foundation for:

- Social skills, emotional well-being and independent thinking.
- Sensory and motor processing unique to each child.
- Relationships with family, teachers and peers.

The TherapyWorks Program

- Individual Treatment
- Group/Peer Interaction
- Parent Coaching
- Skilled Therapists

Floortime™ is a trademark of the Interdisciplinary Council on Developmental and Learning Disorders, Inc.

Sensory Processing

Most children with autism have some form of sensory processing disorder. Sensory integration problems have a tremendous impact on motor skills, behavior, learning and a child's ability to process information and respond to the demands and changes of daily life.

Signs include:

- Withdraws from touch, avoids certain textures, clothing or food.
- Difficulties with speech, overly sensitive to loud noises or sounds and problems following directions.
- Fearful response to ordinary movement; poor balance, clumsy or weak.
- Difficulty with motor coordination or with learning a new task.
- Poor problem solving; difficulty adapting to new situations.
- Limited social skills or difficulty playing with other children.

Working Wonders...

“My daughter has come a long way since she began coming to TherapyWorks. The hours the therapists have put in and the things they have provided us to do at home have helped tremendously. They were able to **give us the tools** to help her become the person she is now.”

- Jane, parent

“Without TherapyWorks, I don't know where we would be with my nephew. He **stays in our world** now; he talks with us and interacts with us.”

- Jeannie, aunt of patient

**TherapyWorks can help your child.
